Chapter 1 Introduction

1.1 Overview

iVMS-4500 V3.0 mobile client software, which is designed for iPad on the basis of iOS (Version 3.2 or higher), can be used to remotely monitor the live video from embedded DVR, NVR, network camera, network speed dome and DVS via wireless network, play back record files and realize PTZ control as well.

With this software installed in your iPad, you are able to log on to the front-end device via Wi-Fi or 3G; besides, if there is no public IP available for the device, it's accessible by using a dynamic name, or by mapping ports to the public IP of router. *Notes:*

- 1. Wi-Fi or 3G access service must be supported by the iPad.
- 2. Network traffic charges may be produced during the use of this client software. Please refer to the local ISP.

1.2 System Requirements

iOS 3.2 or higher version, including iPad1, iPad2 and New iPad series products.

1.3 Conventions

In order to simplify the description, we define the "iVMS-4500 (V3.0) mobile client software" as "software" and "DVR, NVR, DVS, IP camera, IP speed dome" as "device" in the following chapters.

Chapter 2 Installing and Uninstalling the Software

2.1 Installing the Software

Steps:

- 1. Log into the **Apple Store**.
- 2. Enter "iVMS-4500 HD" to search mobile client software.
- 3. Download and install it to your iPad.
- 4. After having installed the software successfully, you can click icon to start the software.

2.2 Uninstalling the Software

Click and hold the *icon* in the program list until it changes to *icon*. Click **a** to uninstall the mobile client software.

Chapter 3 Running the Software

After having installed the software successfully, click icon to run the software.

3.1 Interfaces Introduction

The software has three main functions, including Live View, Remote Playback and Configuration.

Icon Description

Icon		Descriptions	
Live View		Live view and PTZ control	
Remote Playback		Play back the recorded files.	
	Dovicos	Display device list, add/delete/modify	
	Devices	device, view device information, etc.	
Configuration	Fouritos	Define specific cameras and views to	
	ravorites	your favorites.	
Local Configuration		Configure password protection and	

	software update.
Holm	View software's version information,
пер	quick operation guide and main features.

3.2 Password Protection

If you set password protection, then only the user that has the password can access the software.

Task 1: Enable Password Protection *Steps:*

1. Click and select is to enter the Local Configuration interface.

VMS-4500 Configuration			
Dev	vices	Local Config	
Fav	vorites	Password Protection	OFF
E Loc	al Config	Update iVMS-4500	Update
tel	р		
2. Slide the	OFF to ON	🔘 in Password Protection item to activa	ate password
protection			

3. In the dialog box, enter the password for the software and click save the settings.

to

Next time, if you want to run the software, you need to enter the password to log in first.

Task 2: Modify the Password

Click Modify Password and enter corresponding information to modify the password.

Modify Password		
Old	1~10 characters	
New	1~10 characters	
Confirm	1~10 characters	
Confirm Cancel		

Task 3: Disable Password Protection

Steps:

- 1. Slide the **ON** to **OFF** in Password Protection item to disable password protection.
- 2. In the pop-up dialog box, enter the password to confirm the settings.

Chapter 4 Device Management

4.1 Adding a Device

You need to add a device firstly that all operations such as live view, playback and device management can be accessible.

Steps:

1. Click and select is to enter the Device Management interface.

i 📀	VMS-4500	Configuration	
.	Devices	Devices	+
	Favorites		
5	Local Config		
	🛟 Help		

2. Click 📑 to add a new device.

💿 iV	/MS-4500	Conf	iguration	
5	Devices	Devices	New Device	Save
	Favorites	Alias	New Device 01	8
5	Local Config	Register Mode	hkDDNS	>
	🛟 Help	Server address	www.hik-online.com	8
6		Device domain	Enter device domain	
<u></u>		User Name	admin	8
		Password		8
		Camera No	1	

- 3. Edit the device name in the Alias field.
- 4. Click the **Register Mode** item to select the register mode of the device to hkDDNS, IP/Domain, or IP Server, and configure the corresponding settings.

hkDDNS: When the device is registered on the hkDDNS server, you need to enter the hkDDNS server address and the device domain name registered on the server.

IP/Domain: You can access the device through fixed IP address or domain name. You need to edit the IP address or domain address and the port of the device.

IP Server: You can access the device through IP Server. You need to set the IP Server address and device identifier which is device name or device serial No..

_			
	hkDDNS	~	
	IP/Domain		
	IP Server		

- 5. Enter the login user name and password of the device to be added.
- 6. Click save to confirm the settings.

Notes:

- 1) If the device is successfully added, the software can obtain the camera information of the device.
- 2) Up to 100 devices can be added.

Click Click to return to the Device Management interface. The successfully added

6		Port	8000	8
		User Name	admin	8
		Password	••••	8
		Camera No	17	

3. Click save the modification.

4. Click Devices to return to the Device Management interface.

4.3 Deleting a Device

In the Device Management interface, select a device and slide the item from right to

Chapter 5 Live View

After the device is successfully added, you can view live video from the devices and control PTZ movement as well.

Note: The PTZ control should be supported by the added device.

Click to enter the Live View interface and the screen will be displayed in 1-division mode by default.

Description of Live View Icons:

lcons	Descriptions		Descriptions
9/9	Hide/Show the device nodes	0	Capture picture of the selected live view window
<u>⊯,</u> ⊈	Start/stop two-way audio		Set image quality to Clear, Balanced or Fluent
*	Set favorite cameras and views	Ģ	Stop all the live view
	Full-screen mode / Restore	L \$	PTZ control

Start Live View

Click the device node to list all the cameras under it. Drag the camera node to the window for live viewing. Alternatively, you can drag the device node to the window for viewing all the cameras of the device.

Note: Up to 16 cameras can be live viewed at the same time. If you drag a device node that contains more than 16 cameras for live view, then the live videos of first 16 cameras will be played.

Image Quality

There are three kinds of image quality, including Clear, Balanced and Fluent (Clear means main stream of device. Balanced means the max resolution of sub stream. Fluent means the second resolution of sub stream). You can click Ze to adjust the performance according to your network status.

Window Division

When all the current windows are in live view, you can drag a more camera node to the live view window until the window division mode switches and then drag it to the free window for live view.

Note: The software supports 1 / 4 / 6 / 9 / 16-division mode.

You can drag and move the window to adjust the window sequence. Double-click the

live view window to display the camera in 1-division mode and double-click again to restore.

Configure My Cameras and Views

In live view mode, you can add the camera or view to the favorites so that you can access the camera or view conveniently.

Task 1: My Cameras

Select a window that is under live view. Click \bigstar and select $\overset{\text{My Cameras}}{=}$ to add the camera to My Cameras.

The successfully added camera will be listed under My Cameras node in the device nodes area. In this way, you can easily view the camera by dragging it from My Cameras node to the window area.

Task 2: My Views

You can add the current view information to My Views. *Steps:*

1. Click 🖈 and select My Views.

- 2. In the pop-up dialog box, edit the name for the view.
- 3. Click Save to confirm the settings.

After that, you can see the view listed under My Views node in the device nodes area. You can drag it to the window area to easily access the common view.

Capture

In live view mode, select the live viewing window and click the 🔯 to capture a picture.

Note: The captured pictures are saved in the *photo* folder of your iPad by default. You can access the directory to view or delete the pictures.

PTZ Control

In live view mode, click \clubsuit to activate PTZ control panel, and the \clubsuit icon changes

to 峰.

Note: The PTZ control should be supported by the added device.

Chapter 6 Playback

You can search the recorded video files from the remote storage device for playback.

Start Playback

Steps:

1. Click 📓 to enter the Remote Playback interface.

- 2. Set the start time and end time in the **From** and **To** text filed to define the search condition.
- 3. Drag the device node or camera node to the display window for playback. *Notes:*
 - 1) You can view the playback of up to 4 windows at the same time.
 - 2) Only the camera with record during that period can be played back successfully.

Chapter 8 Others

Update the Software

When there is a new version available in the App store, the software will prompt you to update the software. You can confirm to update the software immediately. Or you can cancel it and perform the following steps to update the software next time as desired.

Steps:

1. Click and select is to enter the Local Configuration interface:

🕑 i\	/MS-4500	Configuration	
	Devices	Local Config	
	Favorites	Password Protection	OFF
5	Local Config	Update iVMS-4500	Update
	Help		
1			

2. Click Update to enter App store to update the software.

Note: The Update button is only available when here is a new version available in the App store.

Help

Steps:

1. Click and select to enter the Help interface. You can view the version information and the quick operation guide of the software.

2. Click Guide to view the main features of the software.

Chapter 9 Troubleshooting

• What kinds of devices are compatible with iVMS-4500 (iPad) mobile client software?

The devices which adopt H.264, MPEG4 or MJPEG video compression are compatible with this software.

• Why does the mobile client software prompt 'login failed' when access to the device via Wi-Fi?

Please check whether the Wi-Fi parameters are configured properly in your iPad.

• After starting viewing the live video, why does the responding of the mobile device becomes very slow and the video is easy to get stuck?

This problem may due that the lower performance of your iPad, please try to view less cameras at the same time, or decrease the frame rate and resolution, you may refer to the following parameter settings.
