

# Security Center Mobile

## Stay Connected While in the Field

Responding to incidents or emergencies in the field often requires operators to be away from their workstation. **Security Center Mobile** equips security personnel with unified mobile applications for their phones and tablets, allowing them to remotely connect to their security system and receive instant event notifications at all times.

No matter their location, security personnel can monitor their video surveillance and access control systems, receive and acknowledge alarms, and even stream live video from their phone back to Security Center, effectively extending their capability to react to any situation.

## Key Benefits

- ▶ Monitor your Genetec™ video surveillance and access control systems from anywhere
- ▶ Quickly respond to incidents with instant alarm notifications from mobile devices
- ▶ Send live video from iPhone and Android phones directly to Security Center workstations

## Key Features and Specifications

- ▶ **Unified Video and Access Control:** Security Center Mobile enables operators to monitor access control events with associated video and cardholders pictures.
- ▶ **Real-Time Video Streaming:** Capture and send live video back to Security Center, essentially turning Apple and Android smartphones into mobile surveillance cameras.
- ▶ **Control PTZ Cameras:** Control your PTZ cameras through intuitive touch-enabled controls, and PTZ presets.
- ▶ **Mobile Alarm Notifications:** Receive instant push notifications for active alarms and acknowledge these alerts directly from your smartphone.
- ▶ **Playback Video and Bookmark Events:** Instantly playback video and search archived recordings, and rapidly bookmark key events directly from your mobile phone.
- ▶ **Remote Door Access:** Monitor door status information, view access granted/denied events, place doors in maintenance mode, and unlock doors from a distance through your smartphone.
- ▶ **Device Activity Reports:** Reports allow administrators to monitor failed login attempts, device activity, and identify restricted devices.

## Mobile App Requirements

Apple Devices

- Supported on iOS 6.0 and up

Android Devices

- Supported on Android (OS 2.3.3, 4.0-4.4, and 5.0-5.1)

Windows Devices

- Supported on Windows and Windows Phone 8.1

\* Security Center Mobile preview apps offer customers early access to our next generation mobile applications, and allow Genetec™ to obtain continuous feedback on app development. These apps provide a subset of capabilities found within the primary Security Center Mobile applications, and include pre-release or beta features to allow users to evaluate the latest functionality. Through this process, new features are added regularly, in order to deliver the latest enhancements to Security Center Mobile app users.

Security Center Mobile preview apps are provided as-is, and are not covered by Genetec™ customer support.
